5. Visual Analysis

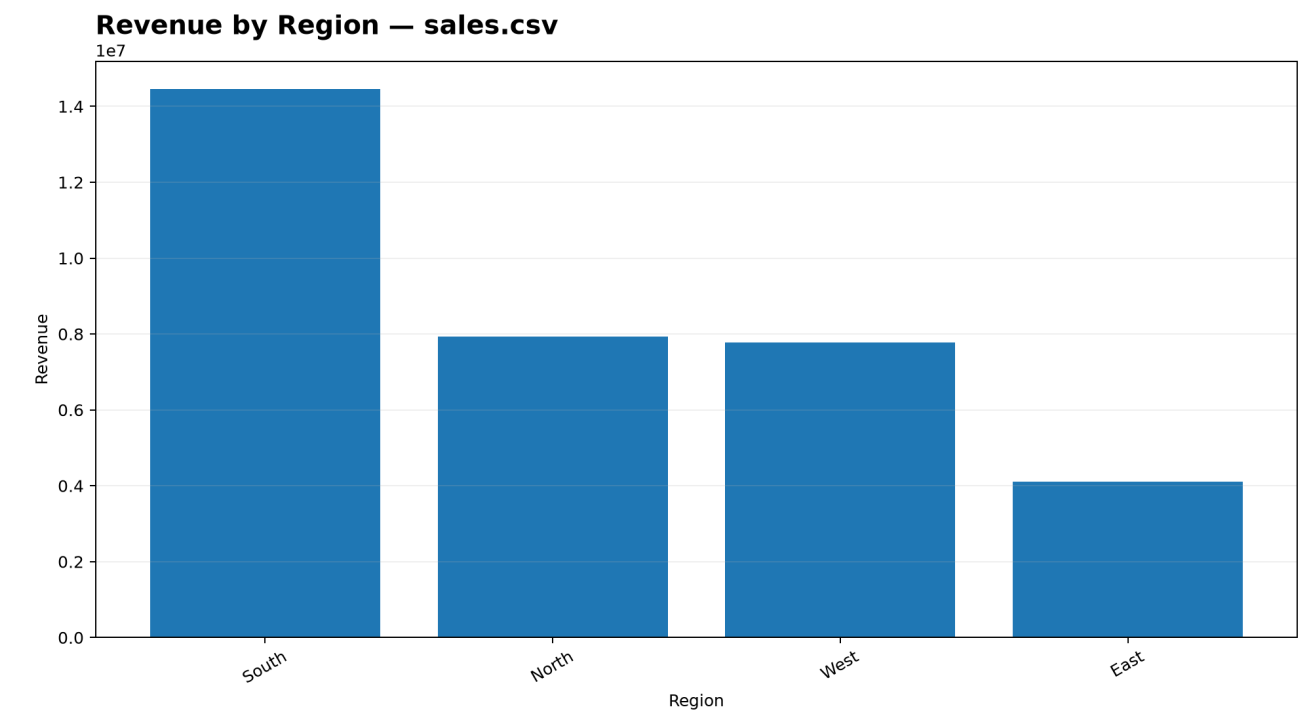

Top Products by Revenue — sales.csv

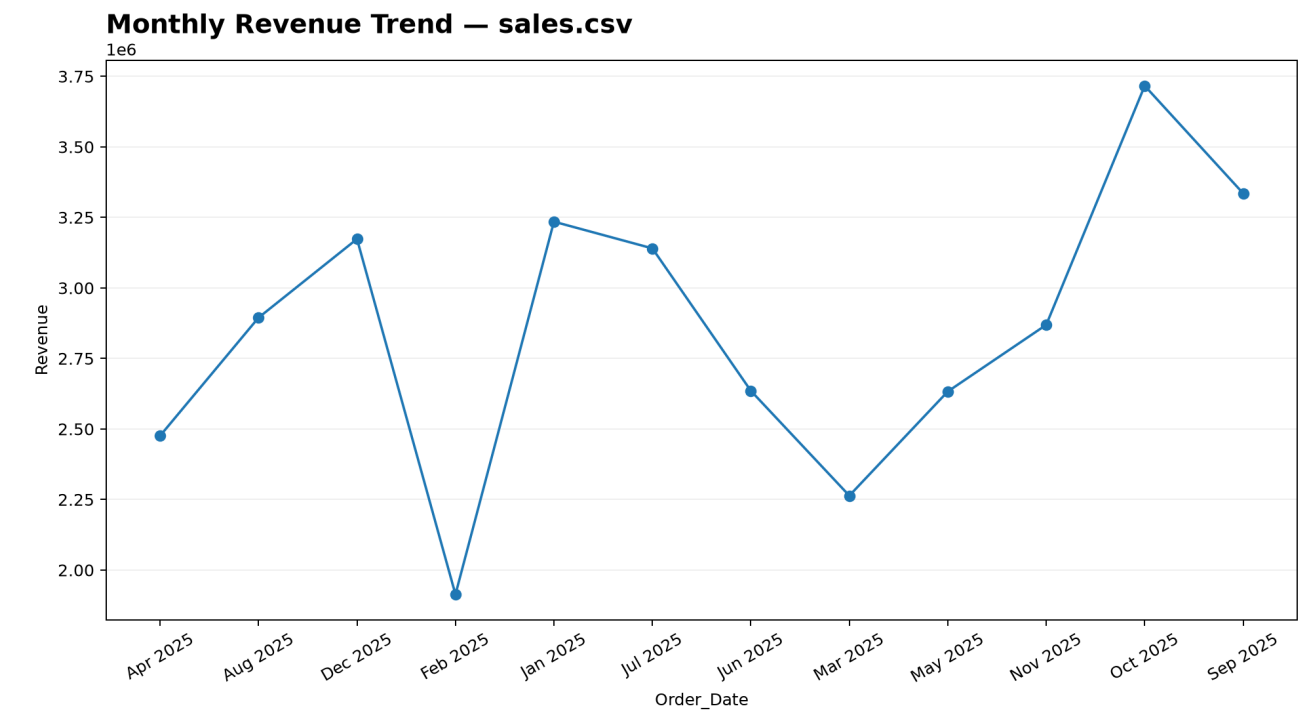

Revenue by Category — sales.csv

Revenue by Region — sales.csv

Monthly Revenue Trend — sales.csv

6. Data Quality

sales.csv: 115 missing cells across 4 columns and 0 duplicate rows.

Empty datasets are excluded from calculations and findings. The report describes patterns supported by the uploaded data and does not establish causation unless external evidence is explicitly available.

7. Conclusion

The report consolidates the available records, quantitative summaries, visual analysis and data-quality observations into one document. All numerical findings are calculated from the uploaded non-empty datasets.
